

STRIP-TILL

“After using TerraNu to increase our soil biological activity, we **gained as much as a 25-30 bushel advantage** on our marginal ground last year. That’s the most we’ve ever seen.”

-Darin Stolte, Olin, IA

- Carbon-based fertilizer that increases crop performance by stimulating soil biology and increasing nutrient uptake.
- TerraNu improves soil health in the strip.
- Uniform nutrient analysis in every granule.
- Low-salt, root-friendly.
- User-friendly: easy-to-apply and blends well with other dry fertilizers, facilitating precision placement and uniform distribution within the strip.
- Improves the nutrient-use efficiency of other products in your program.
- **TerraNu Ignite** – your best fit for strip-till, enhanced NPK plus complete macro- and micronutrient package for your high-yielding crop.
- **TerraNu MicroPack** – soil health and sulfate-based micronutrients in every granule, providing all your micronutrient needs for a high-yielding crop.

Product	Rate	Application Timing	Application Method
TerraNu Ignite	100-200 lbs/acre	pre-plant (fall or spring)	strip-till
TerraNu MicroPack	20-50 lbs/acre		

Work with your consultant or agronomist to find the application timing and methods that work best for you.
